

e-Sourcing and Requisitioning made easy

Benefits

- Focus on key features required by most companies. Can be set up and learned in a week or two, without any training.
- Cloud-based with no need for hardware. Accessed with a subscription fee (SaaS model).
- Reduces time per sourcing event from weeks to days, by cutting out paperwork and resources.
- Up to 98% of all spend is sourced using events with e-procurement systems, compared to 35% traditionally.
- Averages 17% savings per event.
- Transparency and integrity, allows elimination of fraud, waste, errors and maverick buying.
- Enforces compliance with policies and controls.
- Improves record-keeping.
- Can be seamlessly integrated with ERP and other solutions.
- 24/7 helpdesk and online knowledgebase of help articles.
- Transparent and affordable subscription packages for our customers.
- Mobile-friendly.

Once someone in an organization has identified a purchasing need, an e-Procurement system allows them to raise a request for the goods and/or services, prompting those in charge of procurement to create a sourcing event, run the event and collect submissions from suppliers, evaluate the event, make an award, get the necessary internal approvals, and execute the transaction. The aim is nothing less than to get the best product from the best supplier at the best price and at the right time.

Features of Procurehere

Requisitioning

- PR Creation is controlled and expedited with the use of templates. The approvals route in a template is fully configurable by the administrator.
- The items purchased and prices are controlled through the catalogue.
- The process ends with a pdf of the PO, unless it feeds back into the ERP.

RFx

- This feature covers RFI, RFQ, RFP and Tenders.
- Creation is done in a simple wizard with an option of using templates.
- Allows document uploads, meetings, questionnaires, bills of quantities, multiple supplier invitations, insertion into envelopes, and reports.
- Evaluation Committee compares bids on system/Excel download. Can disqualify suppliers, award, and push into data into another event.

Auctions

- Real-time bidding via English, Dutch and Sealed Bid auction types, all in both forward and reverse direction.
- Auction console can be set to either supplier names / ranks / prices.

ERP Integration

- Procurehere comes enabled for integration with SAP.
- This allows you to centralize your supplier management, product categories and so on in the ERP, if you prefer it that way.
- It allows seamless pushing of purchase requisitions in the ERP to e-sourcing events in Procurehere, and back into the rest of the procure-to-pay process.
- Integrating with other ERPs is now straightforward and available upon request.

About Privasia Technology

Privasia has its roots in an e-procurement business that commenced in 2001. It was listed on the Malaysian stock exchange in 2009. Today, it is a leading ICT and business process outsourcing player in Malaysia with an established clientele in the ports, utilities, finance, and other sectors. It has 120 staff, comprising mainly IT professionals. The Procurehere platform has facilitated spend of more than US\$ 1.2 billion since 2002, which have realised an average savings of 17% per event.

Features (cont.)

Supplier Management

- Designed to make it as painless as possible for suppliers to self-register onto the platform.
- Suppliers are organized in the searchable global database using category standards.
- Buyers can also classify them using their own categories in their system.

Control Features

- The administrator can set restrictions on users and impose templates.
- Every action in Procurehere is captured in audit trails, and a global viewer role can be created for auditors.

Mobile App

- The mobile app allows events to be searched and browsed, users to approve and perform other simple actions, and viewing of usage metrics.

Helpdesk and Knowledgebase

- 24/7 helpdesk with telephone, chat and email channels.
- Knowledgebase with >100 articles on account and billings, setup, carrying out events and requisitioning, and getting help.
